GBA Offers Support Services for MDX Customers

Warwick, RI – February 22, 2007 – GBA Health Network Systems offers services for legacy MDX software users including assistance with the National Provider Identifier (NPI) and other industry mandated changes.

According to GBA President/CEO Colin P. Barry, “We have long serviced a select group of MDX customers and would like to grow that number. We have employees who have expertly supported MDX users for years. One of the original authors of Calyx MDX, Mark Bamberg, is now employed at GBA as its Director of Research and Development.”

MDX users who would like to learn more about GBA’s support services for their product are urged to call **(800) 421-9497**.

About GBA Health Network Systems – Since 1984 GBA Health Network Systems has been focused on the business of healthcare. Practice Management software and services have been provided to over 10,000 physicians in 48 states.

GBA’s products and services include: practice management, EMR, patient portal, payer portal, third party integration/health exchange, A/R recovery, business and clinical imaging, hardware/network sales and service, live-body support center, and network security services.

In 2004 the company designed, developed, and launched its own browser-based practice management solution – MEDfx – now used by more than 750 physicians in the Northeast.

GBA is a privately-held company and is located in Warwick, RI. Its website is www.gbahn.com.
