MEDfx Practice Management Solution is Successfully Installed in 19 States around the Country

Over 34 Physician Specialties Represented

Warwick, RI – February 13, 2008 – GBA Health Network Systems today announced the successful deployment and installation of MEDfx, its browser-based practice management solution, in 19 separate states around the nation in offices representing 34 different specialties.

MEDfx, the GBA designed and developed software, is used in medical offices ranging from solo physicians to multi-specialty practices with up to 23 physicians and 80 users. Its scalability allows it to serve even larger facilities. It can be deployed at a practice site (On Premise) or in an ASP environment (On Demand). Its ground-breaking design means easy integration to any clinical solution – ranging from Electronic Health Records (EHR) to a community Health Information Exchange (HIE).

Since its launch in 2004, many of the offices that have chosen MEDfx include GBA's own legacy customers using PMS Gold. But migrations to MEDfx have also included many practices using other popular solutions including Medical Manager, MDX, MediSoft, Lytec, and PCN Health Network Systems.

MEDfx users can be found in the following states: California, Connecticut, Florida, Hawaii, Indiana, Louisiana, Massachusetts, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, South Carolina, Tennessee, Texas, Vermont, Wisconsin, and Wyoming.

Among the specialties that have chosen MEDfx are: Allergy, Billing Services, Cardiovascular, Chiropractic, Dermatology, Ear, Nose & Throat, Endocrinology, Family Practice, Gastroenterology, General Surgery, Gynecology, Internal Medicine, Labs, Mental Health, Midwifery, Naturopathic Medicine, Nephrology, Neurology, Neurosurgery, Obstetrics, Ophthalmology, Oncology, Orthopedics, Pain Management, Pediatrics, Plastic Surgery, Podiatry, Pulmonary Diseases, Radiology, Respiratory, Rheumatology, Urology, Vascular Surgery, and Walk-in.

About GBA

Founded in 1984, GBA Health Network Systems ranks as one of the most successful privately held medical software companies in the United States. GBA, along with its flagship product, MEDfx, provides the only high definition, browser-based practice automation solution that leverages community interoperability to deliver unparalleled usability and freedom in an integrated PM/EHR. In its 24 year history, GBA has provided ambulatory solutions to over 10,000 practices nationwide. Visit us on the web at www.gbahn.com.
